DETAILED ACTION

This Office Action is in response to the Applicants' amendment filed December 7, 2005.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Joe McKinney Muncy on February 17, 2006.

Allowable Subject Matter

Claims 1, 3, 5-20 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art of record does not disclose, make obvious, or otherwise suggest the structure of the applicant's together with the other limitations of the independent claims, such as

in claim 1, "a plurality of independent chip carriers secured on the conducting wire holders, wherein the independent chip carriers have a multi-layer structure, middle

Application/Control Number: 10/821,967

Art Unit: 2822

layers of the independent chip carriers being insulators used to separate the semiconductors from the conducting wire holders', a plurality of semiconductor chips secured on the independent chip carriers; a first curved surface made of a portion of the conducting wire holders, wherein the semiconductor chips are placed at a focus of the first curved surface; a plurality of independent connecting components made of another portion of the conducting wire holders; and a second curved surface surrounded by a package body, wherein the semiconductor chips are placed at a focus of the second curved surface";

in claim 16, "a plurality of independent chip carriers secured on the conducting wire holders; a plurality of semiconductor chips secured on the independent chip carriers; a first curved surface made of a portion of the conducting wire holders, wherein the semiconductor chips are placed at a focus of the first curved surface; a plurality of independent connecting components made of another portion of the conducting wire holders; and a second curved surface surrounded by a package body, wherein the semiconductor chips are placed at a focus of the second curved surface; wherein the first curved surface is coated with a material able to enhance a reflective capability; and

in claim 18, "a plurality of independent chip carriers secured on the conducting wire holders; a plurality of semiconductor chips secured on the independent chip carriers; a first curved surface made of a portion of the conducting wire holders, wherein the semiconductor chips are placed at a focus of the first curved surface; a plurality of independent connecting components made of another portion of the conducting wire holders; and a second curved surface surrounded by a package body, wherein the

Art Unit: 2822

semiconductor chips are placed at a focus of the second curved surface; wherein the second curved surface is made of or coated with a material able to enhance a reflective capability".

The dependent claims being further limiting and definite are also allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The following patent are cited to further show the state of the art with respect to optical semiconductor devices:

DiLeo et al. (4,209,358) Durocher et al. (US 6,614,103 B1)

Hsuan et al. (US 6,239,367 B1) Ih (US 6,417,017 B1)

Jankowski (3,764,862) Merrick et al. (5,148,243)

Sako (5,049,977) Sawaya (5,083,189)

Sudo (5,198,684) Takahashi (5,218,233).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ida M. Soward whose telephone number is 571-272-
